Introduction

This resource kit aims to provide information and resources to empower you in supporting your clients and caregivers in the community. If you need any clarification, please contact your respective Programme Manager or email ccmh@aic.sg.

About the Community Mental Health Masterplan & Programmes

Since 2012, the Agency for Integrated Care (AIC) was appointed by the Ministry of Health to develop the Community Mental Health (CMH) Masterplan. The plan focuses on working closely with the health, social and community care partners to build an integrated mental health network to better support for persons at risk/with mental health issues including dementia and their caregivers in the community.

You can strengthen your mental wellbeing through coping strategies such as finding ways to de-stress and relax. If you need help managing stress or mental health issues, do seek help early. And if you are a caregiver, there is support available for someone with a mental health condition. Here are some examples of the support you can find near home.

How can you prevent mental health issues?

- LEARN** how to stay mentally "fit" through courses and talks on topics like mindfulness, stress management and family relationships building.
- STAY ACTIVE** and make new friends by taking part in activities at your nearest wellness centres.
- STAY IN TOUCH** with your family and friends! Go out and take part in hobbies together.
- VISIT A GP**, or a doctor at the polyclinic / specialist outpatient clinic for consultation, assessment and treatment near home.
- SEEK HELP** from community intervention teams that provide psychotherapy, basic emotional support, caregiver education and care coordination.
- SEEK ADVICE** from a social worker or counsellor if you think you or someone is mentally troubled or feels overwhelmed.
- REACH OUT** to the community for support, e.g. community outreach teams. Many frontline staff from the grassroots, government and corporate organisations are trained to provide basic support on mental health and dementia.
- COMMUNITY INTERVENTION** teams work with doctors to provide additional support.
- What should you do if you feel mentally unwell?**
- SUPPORT** one another in your recovery journey by joining support groups formed by various community organisations.
- If you are a caregiver**
- RELIEVE** the stress of caring for loved ones at home by tapping on caregiver support and respite services such as the eldest service.
- CONSIDER** dementia or psychiatric day care for your loved one so you can work with a peace of mind.
- STAY-IN CARE** and support is available at nursing homes and psychiatric rehab centres if you are unable to care for your loved one at home.
- GO FOR CARE** caregiver training courses to learn how to better care for your loved one instead of worrying you are doing it poorly.
- TAKE CARE** of your own wellbeing. Talk to other caregivers for emotional support by joining a caregiver support group. Dementia-friendly Communities have caregiver support networks that organise activities for caregivers that emphasise self-care.

If you need more information and resources, do write to cmh@aic.sg

Overview of the Mental Health Support & Services

Programme	What it does	Who will benefit
Community Outreach Team (CREST) aka Community Resource, Engagement and Support Team	<p>The Community Outreach Team (CREST) focuses on raising public awareness of mental health conditions and dementia, promotes early recognition of at-risk individuals, provides emotional support to individuals and their caregivers and links individuals to relevant health and social care services when necessary.</p> <p>The Caregiver Community Outreach Team (CREST-Caregivers) focuses on caregivers who have or are at risk of developing depression, anxiety and burn-out due to their caregiving role. The team increases public awareness of caregiving concerns, promote identification of caregiver needs, supports caregivers in self-care and links caregivers up with support groups and counselling services where needed.</p> <p>The Youth Community Engagement Team (CREST-Youth) increases awareness of mental health and promotes early identification by organising outreach events, involving parents and peers in the recovery journeys and link them to appropriate health and social support networks.</p>	<p>General public.</p> <p>Clients or caregivers identified to be and at-risk of having mental health conditions and dementia.</p> <p>Caregivers identified to have or be at risk of developing mental health conditions due to caregiving duties.</p> <p>CREST-Youth's target population is in the 1) general youth population 2) youths at-risk of developing mental health issues</p>

Programme	What it does	Who will benefit
	Promote the recognition of early signs and symptoms of mental health conditions.	and 3) caregivers of youths with mental health issues. Youth is defined here as 12-25-year-old, not yet in the workforce.
Community Intervention Team (COMIT)	The Community Intervention Team (COMIT) provides assessment, counselling, therapy, case management and psychoeducation support for clients with mental health issues and dementia, including their caregivers. COMIT works closely with the Community Engagement Teams, General Practitioners, Polyclinics and other community partners to provide holistic care to clients.	Clients or caregivers identified to be having mental health conditions and dementia.
Youth Integrated Team (YIT)	The Youth Integrated Team (YIT) conducts targeted outreach to increase awareness of mental wellness, provides assessment, therapeutic intervention and case management while engaging youth for ongoing monitoring and support.	Youths at-risk of, showing signs and symptoms of, or diagnosed with mental health conditions, and their caregivers. Youth is defined here as 12-25-year-old, not yet in the workforce.
Aftercare	The Aftercare programme provides transitional care support and coordinated case management for clients with complex needs and frequent relapse episodes, to optimise functioning, sustain their psychological well-being and re-integrate them back into the community.	Persons age 15 years and above with mild to moderate mental health conditions and have consented for co-management by the restructured hospital and identified community partner. Complex needs (two or more needs) and/or those with frequent relapse episodes, non-adherence to treatment and appointment

Programme	What it does	Who will benefit
Assessment & Shared Care Team (ASCAT)	The Assessment & Shared Care Team (ASCAT) comprises of a multi-disciplinary team to provide assessment, treatment, and holistic care for clients with moderate to severe mental health conditions.	Patients with moderate to severe mental health conditions such as depression, dementia, anxiety etc. requiring assessment, diagnosis, stabilization and treatment.
Mental Health in Primary Care <i>(comprising Polyclinics, General Practitioner (GP) clinic, Polyclinic & Family Medicine Clinics)</i>	Persons with mild to moderate mental health/dementia* and chronic health conditions can seek holistic treatment at a nearby General Practitioner (GP) clinic, Polyclinics or Family Medicine Clinics (FMCs), which is closer to home and in a less stigmatising environment.	Clients with mild to moderate MH conditions and dementia who need intervention and support
Dementia-Friendly Singapore	The Dementia-Friendly Singapore (DFSG) is an initiative, led by AIC and in collaboration with community partners, announced by the Ministry of Health in 2016 to address the dementia prevalence in Singapore. It aims to An inclusive society whereby persons living with dementia and their families feel respected, valued and confident to live well in the community.	General public on dementia awareness At risks seniors, Person living with dementia, Caregivers Partners who are keen to create a dementia-friendly environment
Night Respite	The Night Respite programme provides respite for caregivers caring for persons living with dementia with sundowning behaviour such as restlessness, agitation, disorientation, visual and auditory hallucination.	Persons living with dementia who are displaying sundowning behaviour and have difficulties sleeping at night. Clients should have a diagnosis for mild or moderate dementia.
Go Respite	Go Respite is a pilot programme that encourages caregivers to plan ahead and identify suitable respite option out of centre and nursing home service through competing some necessary pre-admission applications in advance.	Caregivers who requires short term respite break from caregiving for their elderly loved ones or when foreign domestic worker goes on home leave

Programme	What it does	Who will benefit
Post-Diagnostic Support Dementia	The Post-Diagnostic Support Programme for persons newly-diagnosed with dementia and their caregivers (PDS-Dementia) provides education on the condition, coordinates community resources and facilitates early planning and management of the condition, for persons living with dementia and their caregivers upon diagnosis over six months.	For persons <u>newly diagnosed</u> with dementia and their caregivers for first six months upon the referral.

For case referral /escalation for persons with or at risk of mental health conditions, please write in to careinmind@aic.sg.

CREST (Community Outreach Team)

The Community Outreach Team, also known as the Community Resource, Engagement & Support Team (CREST), focuses on raising public awareness of mental health conditions and dementia, promotes early recognition of at-risk individuals and provides emotional support to individuals and their caregivers. This team works with other community partners on facilitating preventive activities to reduce the risk of mental health issues and conducts meaningful activities to support the clients' well-being and stimulate their cognitive functions. It is also the community node to link individuals to relevant health and social care services when necessary.

The community outreach team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health and dementia to seek early treatment nearer to their homes and ensure that they are well supported in the community.

Key Objectives:

- Raises public awareness of mental health conditions and/or dementia,
- Promotes early recognition of at-risk individuals
- Provides emotional support to individuals and their caregivers
- Collaborates with other community partners on facilitating preventive activities to reduce the risk of mental health issues and conducts meaningful activities to support the clients' well-being and stimulate their cognitive functions
- Serves as the community node to link individuals to relevant health and social care services when necessary

CREST – Caregivers (CG)

The Caregiver Community Outreach Team, also known as the Community Resource, Engagement & Support Team (CREST)-Caregivers, focuses on caregivers who have or are at risk of developing depression, anxiety and burn-out due to their caregiving role. The team increases public awareness of caregiving concerns and promote identification of caregiver needs. The team also supports caregivers in self-care through health and wellness activities, stress management and future planning. Caregivers are linked up with support groups and counselling services where needed.

The Caregiver Community Engagement Team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health issues and dementia to seek early treatment nearer to their homes and ensure that they are well-supported in the community.

Key Objectives:

- Increase public awareness of active ageing, preventive care on physical and mental health by organising outreach events/activities to caregivers.
- Promote the identification of caregiver needs and link up to support services in the community.
- Provide basic emotional support, mental wellbeing and support to caregivers.
- Empower caregivers to be able to support other caregivers.

CREST-Youth (Youth Community Outreach Team)

The Youth Community Outreach Team, also known as the Community Resource, Engagement & Support Team (CREST)-Youth, increases awareness of mental health and promotes early identification by organising outreach events for the youth population, as well as those in their circles of support. The team involves parents and peers in the recovery journeys through youth-for-youth initiatives. The team is also the community node linking youths and their families to appropriate health and social support networks.

The Youth Community Engagement Team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health issues and dementia to seek early treatment nearer to their homes and ensure that they are well-supported in the community.

Key objectives:

- Increase public awareness of mental health by organising outreach events for the youth population, as well as those in their circles of support.
- Promote the recognition of early signs and symptoms of mental health conditions.
- Provide coordinated person-centric care (social and health), information and support for youths and their caregivers through providing basic emotional support, follow up and service linkage.
- Involve parents and peers in the recovery journey of youths.

Target Population:

- Youth aged 12-25
- Youth with mild mental health issues, or at-risk of developing mental health issues
- Caregivers of youth with mild mental health issues, or at-risk of developing mental health issues

Service Elements:

- Outreach and education
- Early identification, Basic Emotional Support, Service Linkage and Monitoring
- Youth peer support / youth-for-youth initiatives

COMIT (Community Intervention Team)

The Community Intervention Team (COMIT) provides assessment, counselling, therapy, case management and psychoeducation support for clients with mental health issues and dementia, including their caregivers. With the assessment, the team develops individualised care plans for clients or link up the clients with other more suitable services. Caregivers will be provided with the appropriate assessment and intervention such as psychoeducation, training, support and support group. COMIT works closely with the community outreach teams, partner General Practitioners, Polyclinics and other community partners to provide holistic care to clients.

The Community Intervention Team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health and dementia to seek early treatment nearer to their homes and ensure that they are well supported in the community.

Key Objectives:

- Provide assessment, psychosocial intervention which includes case management and appropriate therapy(s) for clients and their caregivers.
- Provide clients and their caregivers with education, training and support to equip and enable them to live well in the community.
- Facilitate a seamless continuum of care for clients and working closely with community mental health service providers including CREST to transit the care of those stabilized clients with chronic needs who will still require longer term monitoring and follow up
- Network and collaborate with primary, health, community and social care partners to provide holistic care for clients and their caregivers in the community.

Youth Integrated Team

The Youth Integrated Team (YIT) increases awareness of mental wellness through targeted outreach to youth at risk of mental health issues. It provides assessment, therapeutic intervention and case management while engaging youth for ongoing monitoring and support. The team facilitates the formation of supportive relationship with family and peers, and works actively with other youth agencies, schools and community partners to provide holistic case management for the youths and their families.

The youth integrated team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health issues and dementia to seek early treatment nearer to their homes and ensure that they are well-supported in the community.

Key objectives:

- Increase awareness of mental health through targeted outreach to youth at higher risk for mental health conditions, their families and their support systems.
- Promote recognition of early signs and symptoms of mental health conditions.
- Provide coordinated person-centric care intervention and support for youths and their caregivers through providing assessments, therapeutic interventions and case management.
- Engaging community and healthcare partners to build a supportive environment for youths with mental health issues through active collaborations and co-management of cases.
- Facilitate the formation of supportive relationships with families and peers in the recovery journey of youths.

Target Population:

- Youth aged 12-25
- Youths at-risk of, displaying signs and symptoms of, or diagnosed with mental health conditions
- Caregivers of youths at-risk of, displaying signs and symptoms of, or diagnosed with mental health conditions

Service Elements:

- Outreach and education
- Early identification & Assessment
- Case Management
- Therapeutic Intervention
- Maintenance & Monitoring
- Family Work
- Youth peer support / youth-for-youth initiatives

Aftercare

The Aftercare programme provides transitional care support for clients who have complex needs and frequent relapse episodes. After discharge from the hospital, coordinated case management is provided to optimise functioning of the clients, sustain their psychological well-being and re-integrate them back into the community.

Aftercare is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), with the aim to integrate health and social care through collaborative partnership by providing holistic needs assessment and management in collaboration with identified health and social care partners.

Aftercare focuses on a collaborative transitional care approach and helps to streamline the client's transitional process between the acute hospital and community partners. Aftercare clients would benefit from transitional care to improve on their health outcomes and ultimately, reduce hospital re-admission and enable clients to stay well in the community with appropriate community support. Clients are identified from the hospital system or by the community partners and grassroots through criteria such as frequent relapse episodes, non-adherence to treatment or TCU and/or having two or more needs (complex needs). After which, they are screened by Aftercare Case Manager (ACM) for consent to engage in the collaborative and coordinated case management.

Type of services provided by Aftercare Case Managers include:

- Single Point of Contact between community partners and restructured hospital
- Joint home visit(s) for assessment and community support
- Facilitate information flow amongst the stakeholders within the Integrated Health (Mental and Physical Health) & Social Support Network
- Lead role to provide one care plan to be shared with RH and partners
- Resource person for services and provide service linkage through working closely with the frontline agencies

Aftercare started in Institute of Mental Health (IMH) to support mental health clients' in their transition back into the community at 4 pilot sites, in collaboration with community partners. The IMH pilot has since been subsumed into IMH's case coordination structure. Currently, Aftercare is available at two restructured hospitals in the Western Region, with the support from community partners

Intake criteria:

Clients age 15 and above and meets at least 1 of the following criteria:

- With complex needs; ie. two or more needs (medical conditions & psychosocial issues)
- Frequent relapse episodes (3 or more psychiatric admissions in a year)
- Non-adherence to treatment/TCUs

Exclusion criteria:

- Clients with neuro-developmental issues (Intellectual Disability etc.)
- Clients with addictions, eating disorder, severe antisocial personality and forensic/legal proceedings
- Clients who cannot and/or refuse to consent to be co-managed by the Aftercare service

ASCAT (Assessment & Shared Care Team)

ASCAT comprises a multi-disciplinary team to provide assessment, treatment and holistic care for clients with moderate to severe mental health conditions. In addition to supporting clients and caregivers, the team also builds capability of community mental health providers through training and clinical leadership.

The Assessment & Shared Care Team is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH). The programme enables persons living with mental health issues and dementia to seek early treatment and community support nearer to their homes.

Key Objectives:

- Provide fast-track clinical care including quick stabilisation, assessment, diagnosis and treatment for person with mental health conditions
- Develop capabilities of providers including primary care physicians, for example GPs and community agencies to provide quality mental health care through training and professional support
- Develop community support initiatives and provide clinical leadership in the development of integrated community mental health network

Intake Criteria:

- Clients aged 15 years and above (except for ASCAT KTPH who caters to clients aged 18 years and above)
- With moderate to severe mental health conditions requiring diagnosis and stabilization

Details of ASCAT Programme Providers are:

Region	Service Providers	Contact
East	ASCAT CGH	Appointment line: 6850 3333
Central	ASCAT IMH	Appointment line: 6389 2200 Email: imh_appt@imh.com.sg
North	ASCAT KTPH	Appointment line: 6555 8828 Email: ktph.thrive@ktph.com.sg
West	ASCAT NTFGH	Appointment Line: 6908 2222 Email (For Western Region only): JHCampus_CMH_Programme@nuhs.edu.sg
West	ASCAT NUH	Appointment Line: 6908 2222

Mental Health in Primary Care

Persons with mild to moderate mental health/dementia* and chronic health conditions can seek holistic treatment at a nearby General Practitioner (GP) clinic, Polyclinics or Family Medicine Clinics (FMCs). The programme enables individuals to seek consultation, diagnosis and treatment close to home in a less stigmatising environment.

Mental Health in Primary Care is one of the programmes under the Community Mental Health Masterplan developed by the Agency for Integrated Care (AIC), together with the Ministry of Health (MOH), which enables persons living with mental health issues and/or dementia to seek early treatment nearer to their homes and ensure that they are well-supported in the community.

Services

- Provide consultations, diagnosis and treatment for clients with physical health needs and mild to moderate mental health conditions/dementia
- Provide co-management through team-based approach involving medical and allied health services

Programme	Conditions Seen
Mental Health in Polyclinics Programme	Depression, Anxiety, Insomnia, Dementia
Mental Health General Practitioners Partnership / PCN Mental Health (PCN-MH)	Depression <i>Under Healthier SG, anxiety and insomnia will be rolled out in Phase 1, dementia will be rolled out in Phase 2.</i>

Programmes

a) Mental Health in Polyclinics Programme

The Mental Health in Polyclinics Programme consists of doctors, psychologists, medical social workers and nurses. They work together to support the polyclinics' patients with mild to moderate mental health conditions. With a multi-disciplinary team, clients with mental health/dementia and chronic physical conditions can be managed within the polyclinics.

*Refer to **Annex A** for list of Polyclinics with mental health and/or memory clinics.*

b) Mental Health General Practitioners Partnership (GP Partnership) / PCN-MH

GP Partners are medical doctors who provide both medical and physical health assessments. The GP Partners also provide medications for clients who require psychiatric medical interventions.

GP Partners under the PCN-MH programme adopt the practice of co-managing patients through team-based approach by collaborating with PCN nurse counsellors to provide mental health support. The programme aims to improve early identification, diagnosis, and treatment of mental health conditions by screening patients in PCN with existing chronic conditions and mental health needs.

*Refer to **Annex B** for list of GP Partners.*

How to Decide between a GP Clinic and Polyclinic

Below are some factors for consideration when recommending a GP Clinic or Polyclinic to your client or caregiver:

- Find out whether your client is currently on any regular chronic follow-up with a Family Physician at a GP clinic or polyclinic
- Understand their financial status to assess which service is more affordable for them
- Find out where they stay and locate the closest available primary care provider in the vicinity

Factors	Description
<p>Current Primary Care Provider</p> <p><i>E.g. Family Physician for existing chronic conditions</i></p>	<ul style="list-style-type: none"> • Check if your client is currently on any regular chronic follow-up with a Family Physician at a GP clinic or polyclinic: <ul style="list-style-type: none"> ○ If your client has <u>existing chronic follow-up appointment</u> with a Family Physician at a GP clinic or polyclinic, it is recommended to refer your client to their current provider for continuation of care ○ If your client <u>does not have a chronic follow-up arrangement</u> with a Family Physician at a GP clinic or polyclinic, recommend a GP from the list of MHGPP GP partners in Annex B
<p>Affordability</p>	<ul style="list-style-type: none"> • MediFund / Medication Assistance Fund (MAF) <ul style="list-style-type: none"> ○ Financial coverages provided under the MediFund and MAF schemes do not extend beyond public healthcare institutions (PHIs), e.g. Public acute hospital, SOC, and polyclinic ○ If your client is a Medifund / MAF scheme recipient, please recommend your client to visit a polyclinic for medical treatment • Other medical financial schemes, e.g. Private insurance / company insurance / Civil Servant Card (CSC) <ul style="list-style-type: none"> ○ If your client has other medical financial coverage, your client may want to select a provider that is covered under the scheme to optimize affordability • Community Health Assist Scheme (CHAS) and Medisave <ul style="list-style-type: none"> ○ Community Health Assist Scheme (CHAS) enables all Singapore Citizens, including Pioneer Generation (PG) and Merdeka Generation (MG) cardholders, to receive subsidies for medical care at participating CHAS GP clinics ○ For patients with chronic conditions*, CHAS complements the Chronic Disease Management Programme (CDMP), which allows for MediSave to be used for outpatient treatment covered under CHAS <p><i>*There are 23 chronic conditions covered under CDMP, namely, Allergic Rhinitis, Anxiety, Asthma, Benign Prostatic Hyperplasia, Bipolar Disorder, Chronic Hepatitis B, Chronic Obstructive Pulmonary Disease, Dementia, Diabetes Mellitus (DM) (including Pre-Diabetes), Epilepsy, Gout, Hypertension, Ischaemic Heart Disease, Lipid Disorders, Major Depression,</i></p>

	<i>Nephritis/Nephrosis (Chronic Kidney Disease), Osteoarthritis, Osteoporosis, Parkinson's Disease, Psoriasis, Rheumatoid Arthritis, Schizophrenia, Stroke.</i>
Accessibility	<ul style="list-style-type: none"> • With a nation-wide selection of Mental Health GP partners, you may recommend a GP clinic located at your client's preferred region or location • For example, if your client has a preference for a GP clinic located specifically in Bedok, go to Annex B for the list of MHGPP GP partners. First identify the region of Singapore, East Region and next, identify the URA region, Bedok • In addition, with longer opening hours, GP clinics provide access to timely care for clients with non-emergency conditions

Healthcare Schemes and Subsidies

With national healthcare financial schemes such as Community Health Assist Scheme (CHAS) and Medisave, patients are able to receive affordable care for chronic and mental health conditions in the community setting, by accessing subsidies under these schemes. Medisave complements CHAS subsidies, allowing patients to tap on Medisave to claim for outpatient treatment of the chronic condition to defray the costs of the treatment received.

Under Chronic Disease Management Programme (CDMP), the list of mental illnesses covered by Medisave are:

1. Major Depression
2. Anxiety
3. Bipolar Disorder
4. Schizophrenia

Financial Scheme	Description																	
CHAS Pioneer Generation (PG) Merdeka Generation (MG)	<p>CHAS subsidy tiers are applied based on the type of CHAS card that the patient has, namely the CHAS Blue, Orange or Green tier. <p><u>For usage of Medisave funds</u></p>														
<ul style="list-style-type: none"> • Withdrawal limits will be determined on a <u>per-patient basis</u> to allow for more targeted support based on an individual's condition • A co-payment of 15% will apply to each outpatient bill (i.e. patient is required to pay out-of-pocket 15% of the bill) 														

Financial Scheme	Description
	<ul style="list-style-type: none"> Patients may tap on their own or their family members' Medisave accounts to pay for their chronic disease treatment, up to their prevailing withdrawal limit of \$500/\$700 Claim amount resets on 1 January of each year
Flexi-Medisave	<p><u>For usage of Flexi-Medisave funds</u></p> <ul style="list-style-type: none"> Flexi-MediSave can be used for outpatient medical treatments (i.e. visits that do not involve a hospital stay or day surgery) received at polyclinics, public sector Specialist Outpatient Clinics, and participating CHAS GP clinics. Patients aged 60 and above can use up to \$300 <u>per patient</u> per year from their own or their spouse's MediSave Account for outpatient medical treatment, Both patient and spouse should be <u>aged 60 and above</u> for the patient to tap on the Flexi-Medisave Flexi-MediSave can be used together with other outpatient MediSave limits, such as the MediSave500/700 limit <p>For more information on Medisave/Flex-Medisave, you can find out more at https://www.moh.gov.sg/cost-financing/healthcare-schemes-subsidies/medisave.</p>

Case Scenarios of CHAS and Medisave Subsidies

Examples of itemised bill at a CHAS and Mental Health GP Clinic for illustration purpose only

Scenario 1

Mdm Teo is a working adult, not married, and has no children. She visits her regular GP, who is also a Mental Health GP. Her GP diagnosed her with depression. Mdm Teo can use up to a total of \$500 (annual withdrawal limit for simple chronic patient) from her MediSave account to pay for treatment related to depression. She is also eligible for the Orange CHAS card which has a claim limit of \$50 per visit / \$200 per year (withdrawal limit for simple chronic patient).

Description	Fee
Consultation	\$30.00
Medication (<i>6 months' supply of medication</i>)	\$43.00
Total Bill Before Subsidy	\$73.00
- Deduct Orange CHAS subsidy	– \$50.00
Total Bill After CHAS Subsidy	\$23.00
- Deduct Medisave CDMP Claim	– \$19.55
Total Out-of-Pocket Amount Payable	\$3.45

Scenario 2:

Mr Tan is a working adult, married, and has a child. Mr Tan is diagnosed with anxiety and hypertension by his regular GP, who is also a Mental Health GP. He is eligible to utilise up to \$40 per visit / \$160 per year (withdrawal limit for complex chronic patient) from his Green CHAS card and up to a total of \$700 (annual withdrawal limit for complex chronic patient) from his, his spouse's, or his child's MediSave accounts. Mr Tan has already utilised \$400 from his MediSave account for the treatment of his hypertension and anxiety conditions this year.

- Since Mr Tan has already utilised \$400 from his MediSave account this year, he can still withdraw up to an additional \$300 from his own MediSave account for the treatment of his chronic diseases;
or
- His spouse or child can withdraw up to \$300 from their MediSave accounts for Mr Tan's treatment

Description	Fee
Consultation	\$50.00
Medication (6 months' supply of medication)	\$86.00
Total Bill Before Subsidy	\$136.00
- Deduct Green CHAS subsidy	— \$40.00
Total Bill After CHAS Subsidy	\$96.00
- Deduct Medisave CDMP Claim	— \$81.60*
Total Out-of-Pocket Amount Payable	\$14.40

**For patients who have depleted their MediSave accounts, the total out-of-pocket amount payable will be \$96.00.*

Frequently Asked Questions on PCN-MH

1. What is the difference between MH GPP and PCN MH?

PCN-MH focuses on holistic management of chronic and mental health conditions. GP partners under PCN-MH conduct screening for early identification of mental health needs in chronic clients, and are resourced with Nurse Counsellors who provide supportive counselling for clients with mild mental health conditions. MH GPP GPs provide assessment, diagnosis, and treatment of mild-moderate mental health conditions. Allied health and psychotherapy interventions for mild-moderate conditions are provided by COMIT.

2. How would PCN-MH GP refer to COMIT?

PCN-MH GPs can refer clients with moderate mental health condition to COMIT teams via CareinMind. GPs will email CareinMind with a completed referral form, and CareinMind will triage to COMIT service providers based on the service boundaries and services requested by client.

3. Will AIC be providing subsidies for the services offered by GPs subsidised? What are the criteria that clients will need to fulfil to receive subsidised care?

Majority of GP Partners are CHAS accredited and all MH GPPs are CDMP-MI accredited (Chronic Disease Management Programme-Mental Illness). CDMP complements existing CHAS subsidies, and clients can tap on Medisave to claim for outpatient treatment of the chronic condition to defray the costs of the treatment received at the GP clinic.

4. Will there be subventions provided for PCN-MH GP referrals to SOC or will they be charged at a private rate?

PCN-MH GPs are also CHAS GPs, as such, any referral made to SOC from a CHAS clinic and client with CHAS card are considered subsidised referral. The level of subsidy at the SOC depends on the type of CHAS card that the client holds. *Refer to Pages 30 – 33 for more information on healthcare subsidies.*

5. Is there an overlap between care by PCN Nurse counsellors and CREST services who also look after low risk MH patients?

The key objective for PCN is to anchor effective chronic disease and mental health management in the primary care with strengthening capability of the GP and nurses as the core focus. As such, the PCN Nurse Counsellor is a key part of team-based chronic disease management to drive close collaboration between GPs. They provide biopsychosocial assessment and client-centred counselling to empower clients to better manage their chronic and mental health conditions. CREST will complement and support the clients who require longer-term monitoring and basic support.

6. Where are the PCN nurses situated?

There are two models for PCN Nurse Counsellors: 1) PCN Nurse Counsellors are engaged by PCN Headquarters and are a shared resource between the clinics within the network and 2) PCN HQ outsources nurse counsellors services to identified service provider within the community.

7. How can SPs like COMIT/FSC work with GPs? Is there a way to communicate with GPs to discuss cases?

We have incorporated the development of processes into the PCN MH model. GPs refer cases to COMIT/CREST via CareinMind. Within the referral form, GPs contact details and the allocated service provider can contact the GP directly for case updates and discussion.

8. In situation when client cannot afford the counselling should the case be referred out to partners?

National financial schemes such as CHAS and CDMP are in place to defray medical cost and treatment. CHAS/PG/MG cardholders enjoy subsidised benefit for nurse counselling services. Clients with financial concerns will be referred to COMIT providers for counselling.

9. Will referrals from GPs be received via IRMS?

Currently, GPs referrals to community partners are via Careinmind@aic.sg. With Healthier SG, the IT system is one of the key enablers to be developed.

Annex A: List of Polyclinics with Mental Health or Memory Clinics

Please call respective polyclinics' general appointment line to make appointment for consultation. Client will only be referred to mental health or memory clinics as determined by polyclinic doctor upon consultation.

Dementia-Friendly Singapore

The Dementia-Friendly Singapore (DFSG) is a national initiative announced by the Ministry of Health (MOH) in 2016 to address the dementia prevalence in Singapore. This was spun off from the ground up Forget Us Not campaign by Lien Foundation, KTPH and partners in making Chong Pang dementia-friendly in 2015.

Under DFSG, the Agency for Integrated Care (AIC) and community partners aim to build dementia-friendly communities and nation to support persons living with dementia through the 3Es strategy. The desired outcomes are promotion of preventive activities, encourage early identification and provision of care and support.

1. Facilitate early identification 2. Promote preventive activities 3. Provide care and support

A Dementia-Friendly Community (DFC) is one whereby people **know** about dementia and mental wellness; Persons living with dementia and their families feel **included, involved** and **supported** in the community.

DFCs are communities within the constituencies where:

- 1. People are aware of dementia and know how to communicate with persons living with dementia**
 - Residents and community partners know where to seek help, aware of signs and symptoms of dementia and know how to communicate with persons living with dementia
 - Include community front liners like grassroots, volunteers, schools, faith-based groups, government agencies, hawkers, businesses, retailers, banks, transport staff
 - Build a pool of Dementia Friends who will assist persons living with dementia and keep a look out if they wander off e.g. bring them to Go-To Points (GTPs)
- 2. Resources exist for early recognition and support for persons living with dementia**
 - Accessible GTPs in each DFCs to provide information, resources and service linkages

- Resources e.g. collaterals, videos, dementia resource portal (DementiaHub.SG) are readily available for residents, community partners and caregivers
- Dementia screening with follow up is available

3. Persons living with dementia and their caregivers feel supported

- People know about dementia and where to seek help, if needed
- Caregivers are well-supported e.g. part of a support group and have a friend to seek help when needed Volunteers are trained as befrienders to provide emotional support
- Flag cases when there are unmet needs and provide service linkage
- Technology is available to help persons living with dementia who wander
- National platform to support caregivers to seek advice, report loss of loved ones with dementia. Public can also call in to inform that they have found reported persons living with dementia
- A dementia membership programme for caregivers and persons living with dementia
- Mobile app which alerts Dementia Friends when a person living with dementia goes missing

4. Businesses and services are respectful and helpful towards persons living with dementia

- Understand the challenges faced by persons living with dementia
- Build physical environment which enables persons living with dementia to move around safely
- Assist persons living with dementia who may need help in finding their way home or bring them to GTPs
- Incorporate dementia awareness training as part of staff training programme

5. Environments are safe and easy to navigate for persons living with dementia

- Easy to move around in the neighbourhood safely
- Business/government agencies upgrade their space to make it more senior-friendly e.g. bigger aisle, bigger signage, better wayfinding markers and dementia-friendly infrastructure

What are the dementia support you can find in a DFC?

1. Prevention
2. Early Identification
3. Care & Support

a) Build Community Awareness

- Public education on dementia signs and symptoms (such as holding talks, workshops, event booths and door to door outreach etc.)
- Awareness workshops for frontline staff and businesses on how to manage people with dementia
- Intergenerational Programme/ Volunteers/ Befrienders to recruit a pool of dementia friends/champions such as students/youths/ passionate individuals about ageing/dementia and wanting to do something for seniors
- Targeted screening for early detection of dementia risks
- Go-To Points to make dementia information readily accessible in the community and safe return points for missing seniors

b) Support for At Risk Seniors/ Person Living With Dementia

- Well:** Keep active to reduce risk of dementia through preventive activities
- Mild Stage:** Services linkages for those with needs
- Moderate and Severe Stage:** Home and mobile-based support and case network for complex needs

c) Support for Caregivers

- A network that emphasises self-care, peer support and recognition
- Respite services and information resources

d) Safe Neighborhood for Person Living With Dementia

- Through environmental studies and infrastructure enhancement
- Tap on technology such as Dementia Friends mobile app to rally for community support to look out for lost persons with dementia
- Collaborate with businesses who are our Dementia-Friendly Partners to create inclusive environment for their staff or/and customers

Where are the DFCs?

How are the DFCs developed?
It takes a **community approach** to build a DFC!

What are the key Dementia-Friendly Initiatives rolled out in the community?

Dementia Go-To Points (GTPs)

GTPs are community nodes that serve as resource centres which provide educational resources and information for the general public, persons living with dementia, and caregivers.

GTP also acts as “safe return” points to assist “lost-and-found” persons living with dementia who wander off in the community to reunite with their family or return home safely. The GTP listing can be found on Dementia Friends mobile app, on DementiaFriendly.sg portal and Health Hub website.

Caregiver Support Network (CSN)

The CSN is another initiative under Dementia-Friendly Singapore to support and connect with caregivers taking care of persons living with dementias, mental health or physical health conditions. CSNs were developed with the intention of enabling caregivers to care for themselves and to become pillars of support for one another.

There are three key focus areas, namely Self-care, Peer Support Network and Recognition. We hope that the CSNs can promote awareness of the different needs required to support caregiving as well as encourage building a supportive network whereby community stakeholders can actively play a role in supporting caregivers and their own well-being in the community.

In each DFC, there is a community outreach team, also known as CREST, which drives the promotion of DFC, provision of dementia, mental health services and care programme.

The following are the CREST partners in the respective DFCs:

DFC	Service Providers
1. Yishun	Montfort Care
2. Hong Kah North	REACH Community Services Society
3. MacPherson	Brahm Centre Ltd
4. Queenstown	Fei Yue Community Services
5. Bedok	Montfort Care
6. Fengshan	Salvation Army
7. Teck Ghee	AMKFSC Community Services LTD.
8. Taman Jurong	NTUC Health Co-operative Ltd
9. Bukit Batok East	Singapore Anglican Community Services
10. Woodlands	AWWA Ltd
11. Toa Payoh West	Care Corner Seniors Services Ltd
12. Toa Payoh East	Care Corner Seniors Services Ltd
13. Kebun Baru	AMKFSC Community Services LTD.
14. Yio Chu Kang	AWWA Ltd
15. Clementi	Fei Yue Community Services

Technology Enablers

CARA Mobile App

Dementia Singapore (DSG), the nation's leader in specialised dementia care, launches a pioneering dementia membership programme that provides personalised support across the journey of living with and caring for dementia.

Called CARA – an acronym for Community, Assurance, Rewards, Acceptance, the four main functions of the membership programme, the mobile application is a digital lifestyle and community platform that provides low-barrier access for persons living with dementia and their caregivers to connect to an ecosystem of solutions and support.

CARA, developed by DSG and supported by AIC and NCSS, is the first dementia membership programme of its kind in the world, and is available on Apple App Store and Google Play Store. Download is free.

Community | Assurance | Rewards | Acceptance

A pioneering dementia membership programme by Dementia Singapore

Value of CARA

Unique identifier and membership card
**for Persons with Dementia*

Safe Return of a lost Person with Dementia

Multiple caregivers can receive important updates at the same time

Tailored benefits and support from the community

Easy access to trusted resources

For more info, scan the QR code:

or visit cara.sg.

For more information on DSG and dementia, please visit www.dementiahub.sg or Dementia-Friendly Singapore Facebook page.

Night Respite

The Night Respite programme provides respite for caregivers caring for persons living with dementia with sundowning behaviour such as restlessness, agitation, disorientation, visual and auditory hallucination. Through the programme, persons living with dementia are engaged meaningfully at night which allows caregivers to have a good rest. The programme, which is part of the Caregiver Support Action Plan, also provides education and support to caregivers.

The Night Respite programme's objectives are two-fold:

- To provide respite for caregivers of persons living with dementia with sundowning behaviour. Caregiver education and support in managing sun-downing behaviour may also be provided.
- To engage persons living with dementia meaningfully during the night respite session, through activities and tasks.

	Region	Providers	Address
1.	North	Vanguard Woodlands Care Home	2 Woodlands Rise Singapore 737749
2.	West	St Joseph's Home (<i>resuming in Q3 of FY22</i>)	36 Jurong West St 24 Singapore 648141
3	East	Peacehaven Nursing Home (<i>resuming in Q3 of FY22</i>)	9 Upper Changi Road North Singapore 507706

Go Respite

Go Respite is a pilot pre-enrolment programme that encourages caregivers to plan ahead and identify a suitable respite option that is able to meet their needs and those of their loved ones.

Caregivers will complete some necessary pre-admission administrative processes early, so that it takes less time to place their loved one in senior care centres or nursing homes, when they need to take respite breaks.

Administrative processes include completing their household means test to assess eligibility for subsidies, providing medical information to assess the suitability for service, shortlisting and registering with potential service provider.

Caregivers whose loved one is successfully pre-enrolled can contact their preferred service provider directly should they require respite care. Pre-enrolment does not guarantee placement and admission to the service is subject to vacancy.

There are two types of respite care options available for pre-enrolment:

(1) At a centre

- Clients will join group activities in the day in a senior care centre.
- Respite care is available on both weekdays and weekends. Usual centre operating hours will apply.

(2) At a nursing home

- Clients will stay in a nursing home where nursing services are available.
- Respite services are available for a minimum of 7 days up to a maximum of 30 days, per calendar year.

List of participating senior care centres and nursing homes

Senior Care Centre

Senior requiring care needs supervision or some assistance with daily care activities such as eating or going to toilet during the day.

Post-Diagnostic Support – Dementia

The Post-Diagnostic Support Programme for persons newly diagnosed with dementia and their caregivers (PDS-Dementia) serves to establish a structured support system which provides information, service linkage and case management. The programme supports both the person living with dementia and their caregivers for six months upon the referral. The PDS-Dementia team, comprising an allied health professional and community liaison coordinators, aims to help them understand their condition, coordinate community resources to support person-centred care and facilitate early planning and management of the disease.

At the point of receiving the diagnosis of dementia, the newly diagnosed person and their caregiver may not fully understand the condition, including where information can be found, what support and care services are available and what to expect as the condition progresses. As a result, help is only sought when there is a crisis, or when there is significant caregiver stress. PDS-Dementia seeks to address this gap by providing timely support from the time of diagnosis to prepare persons with dementia and their caregivers so that they are able to plan for, respond to and manage the situation at home, or work with community partners for suitable care interventions.

For persons who have been newly diagnosed with dementia and their caregivers, the PDS-Dementia team will conduct needs assessment and provide psycho-education and the necessary resources. Based on the needs identified, a personalised care plan will be developed for and together with both the person living with dementia and caregiver. The PDS-Dementia team will also coordinate and link up the person living with dementia and their caregiver with appropriate care services.

The programme also includes a caregiver support network where caregivers can engage and interact with each other through their shared experiences, co-develop solutions to challenges and lean on each other for social and emotional support.

Region Served	Partner Hospital	Service Providers
West	Ng Teng Fong General Hospital	Fei Yue Community Services
North Eastern	Sengkang General Hospital	AMKFSC Community Services Ltd

Post-Diagnostic Support – Dementia service is also offered by Dementia Singapore in partnership with the following hospitals:

Private Ambulance Services

If you need to activate an ambulance in non-emergency situations, here are some private ambulance operators that you may contact. AIC is not affiliated to these companies, if you're interested to engage these companies, please contact them directly for their charges.

Tips:

Let the ambulance operator know what the situation is like eg behaviour of the client, when you contact them.

The Speedoc app for on-demand private ambulance services in non-emergency cases. The cost of a private ambulance via the app can range from \$120 to \$170, depending on the location and time of day.

Active Ageing Centres and Active Ageing Centre (Care)¹

An Active Ageing Centre (AAC) or an Active Ageing Centre (Care) (AAC (Care))¹ is a drop-in social recreational centre that extends support to seniors living nearby in the community. It is a go-to point for seniors to receive timely access to quality care, have the opportunity to build strong social connections, take part in recreational activities, and contribute to the community as they wish.

Compared with Active Ageing Centres, Active Ageing Centre (Care)¹ provide additional care services, such as day care and community rehabilitation, in separate facilities nearby.

AAC/ AAC (Care)¹ provide a suite of services to Singapore Citizens and Permanent Residents aged 60 and above, regardless of housing types and socio-economic status. The services include **A**ctive Ageing activities to keep seniors engaged within the community, **B**efriending or Buddying services for vulnerable seniors who require additional social support, and information and referral to **C**are services when required.

AAC/AAC (Care)¹ also welcome seniors who would like to volunteer at the centre, such as helping out with centre activities, visiting lonely seniors or running errands for seniors.

Please search for the centre closest to you on our [E-care Locator](#)

¹Active Ageing Centre (Care) (AAC (Care)) is formerly known as Active Ageing Care Hub (AACH).

Guide to identify residents who may need mental health support

You may come into contact with residents who may exhibit signs of mental health and social care issues and need advice on what to do and where to seek help. If your resident exhibits any of the below signs and symptoms, they may need support. For support, coordination and service linkage, you may email the Agency for Integrated Care (AIC) at careinmind@aic.sg who will reply within 3 working days.

Appearance

- **Poor hygiene, foul smell** e.g. poor self-care, seen wearing same dirty clothes
- **Malnourished, poor skin care** e.g. underweight, looks weak
- **Poor mobility** e.g. walking slowly with a slouched posture, require walking aids
- **Looking pre-occupied in thoughts or sad or looking or appears inappropriate** e.g. tearing when asked about son, laughing away when informing of a death
- **Dressed inappropriately** e.g. eccentric, unconventional, inappropriate for hot weather

Behaviour

- **Disorganised behaviour** e.g. handling filth like urine and faeces, extreme fidgeting
- **Paranoid behaviour** e.g. multiple padlocks on door, neighbours are spying on him/her
- **Disinhibited behaviour** e.g. flashing, stripping when not under influence
- **Socially isolated** – history from family/neighbours that client used to be sociable but has been more withdrawn and isolated

Cognition

- **Disorientation** e.g. cannot differentiate between day or night, cannot recognise family members, cannot recognise the place that he/she is usually familiar with
- **Memory loss** e.g. cannot remember whether she has taken breakfast, cannot remember where she is staying, cannot recognise family members

Speech

- **Disorganised or incoherence speech** e.g. frequently jumping from one topic to the next even in mid-sentence, answers have nothing to do with the questions asked, mumbling and talking to self as if responding to another person, irrelevant topics
- **Abnormally slowed and delayed speech** e.g. takes a few minutes to say one short sentence

Referral of Suspected Mental Health-Related Cases to AIC
